

SOFE-2720

Tutorial #2

Requirements Templates

What is a requirement? (re-cap)

- A requirement is something that a product must do to support its stakeholders business, or a quality it must have to make it acceptable and attractive to the stakeholders.
- It exists because the type of product demands certain functions and qualities, or because the client justifiably asks for that requirement to be part of the delivered product.

The background of the slide features abstract, curved shapes in shades of orange and blue. These shapes are layered, creating a sense of depth and movement. The top and bottom sections of the slide are dominated by these organic, flowing forms, which frame the central white area containing the title.

Software Requirements Specification

What is a Requirements Document?

A software requirements specification (SRS) or requirements document is a complete description of the behaviour of a system to be developed. It may include a set of use cases that describe the interaction between the system and the user/environment.

Requirements Document Templates

There are many different templates that are used by different groups for requirements documents

- Two most popular: [IEEE](#) and [Volere](#)

Volere Template

Contents

Project Drivers

- 1. The Purpose of the Project 3
- 2. The Client, the Customer, and Other Stakeholders 5
- 3. Users of the Product 6

Project Constraints

- 4. Mandated Constraints 6
- 5. Naming Conventions and Definitions 7
- 6. Relevant Facts and Assumptions 8

Functional Requirements

- 7. The Scope of the Work 9
- 8. The Scope of the Product 10
- 9. Functional and Data Requirements 11

Nonfunctional Requirements

- 10. Look and Feel Requirements 15
- 11. Usability and Humanity Requirements 16
- 12. Performance Requirements 17
- 13. Operational and Environmental Requirements 17
- 14. Maintainability and Support Requirements 17
- 15. Security Requirements 18
- 16. Cultural and Political Requirements 18
- 17. Open Issues 18

Project Issues

- 18. New Problems 19
- 19. Tasks 20
- 20. Migration to the New Product 20
- 21. Risks 20
- 22. Costs 20
- 23. User Documentation and Training 20

- Appendix 21

Requirement #: **75** Requirement Type: **9** Event/BUC/PUC #: **7, 9**

Description: **The product shall record all the roads that have been treated**

Rationale: **To be able to schedule untreated roads and highlight potential danger**

Originator: **Arnold Snow - Chief Engineer**

Fit Criterion: **The recorded treated roads shall agree with the drivers' road treatment logs and shall be up to date within 30 minutes of the completion of the road's treatment**

Customer Satisfaction: **3** Customer Dissatisfaction: **5**

Dependencies: **All requirements using road and scheduling data** Conflicts: **105**

Supporting Materials: **Work context diagram, terms definitions in section 5**

History: **Created February 29, 2010**

9.6.20 Supporting information	74
Annex A (normative) System operational concept	75
Annex B (informative) Concept of operations	87
Annex C (normative) Tailoring policies	89
Bibliography	91
IEEE notices and abstract	93

Key Sections

Introduction

- Provides an overview of the entire SRS.
- Should contain (at least) the following sections
 - Purpose
 - Scope
 - Definitions, Acronyms, and Abbreviations (*)
 - References
 - Overview

Overall Description

- This section describes the general factors that affect the product and its requirements.
- You do not state the specific requirements in this section. You provide a background for those requirements.
 - Product perspective
 - Product functions
 - User Characteristics
 - Constraints
 - Assumptions and Dependencies

Functional Requirements

- This section contains all of the software requirements to a fine level of detail.
- The functional requirements should at the very least include a description of every single input into the system, every output from the system, and all functions performed by the system in response to an input or in support of an output.

Non-Functional Requirements

- Look and Feel Requirements
- Usability and Humanity Requirements
- Performance Requirements
- Operational and Environmental Requirements
- Maintainability and Support Requirements
- Security Requirements
- Legal Requirements

Questions?
